Profile

BCA graduate with a strong foundation in computer science and a passion for developing modern, responsive web applications. Completed courses in front-end development (HTML, CSS, JavaScript) along with basic Python development, and currently expanding expertise in the MERN stack (MongoDB, Express.js, React.js, Node.js).

Actively working on a full-stack project to redesign the Febno Technologies website, using React for the frontend and Strapi as the headless CMS. This project is strengthening real-world skills in component-based architecture, API integration, content management, and modern UI/UX implementation.

Enthusiastic about creating user-friendly, efficient, and visually appealing digital solutions, with a strong drive to grow as a full-stack developer and contribute to impactful tech projects.

Education

Bachelor of Computer Application, Khidmath Arts and Science College 2022 – 2025

Computer science, Navamukunda Higher Secondary School 2020 – 2022

Skills

Technical Skill

- Html, css, javascript
- Bootstrap, GitHub
- Strapi
- REST Api, React.js, Node.js, Express.js, MongoDB

Soft and Communication Skill

- Languages: English, Malayalam
- Leadership and Team collaboration

Courses and Certificates

MERN Stack Present

Python Development

Frontend Web Development

Projects

Febno Technologies (live project)

- Redesigning the Febno Technologies's website
- Developed using react for the fronend and strapi as backend

Book Store

- Full stack project for book store website
- Used React, Node.js, Express.js, MongoDB, Rest API

SpareHub (live project)

Designed a front end of a marketplace for second-hand hardwares and auto parts using Ai prompt

E-commerce CRUD App

- Developed a product management system with Add, Edit, Delete, Cart, and View features.
- Developed using React and Tailwind CSS.

Weather App

- A responsive weather application fetches real-time weather data.
- Also implemented live location fetching using geolocation.

Support Assistant

- Built a simple chatbot to provide instant responses to user queries.
- HTML, CSS, JavaScript.

ChatLoop (Academic project)

- A social media application mainly focuses on user privacy and data security. It is built with Flutter and Python, offering real-time chat, content sharing.
- Used Flutter for mobile app development.
- Python (Django) for backend database management.
